Sioux Chiefs Reproach the Government for Breaking Pledges.

PARTISAN DEBATE IN THE SENATE

A Buncombe Revolut on Introduced in the House by an Alabama M mber-how Life Saving Str one for the Pacific

WASHIN ICN Oct 1) The Sionx chiefs appeared at the interior dejurtiment to day Secretary VIII is assumed the Indiana that he was glid to see them and requested that they proceed to eta their objections to the new dicture reservation. I ohn Grass and The first thing I want to mention is the treaty of 1852 and I ask, you to promptly meet the obligations of that treaty. Pay us whatever rightfully belongs to us and then the Blank hills treaty of 1876. Why is it that we are not post what is due us under these treates? Grass produced a reservation map of Dakota territory and pointing out the big ix reservation said. The western boundary line should be a long way west from the present location. We want \$1. oper acte just what the government sails its lands for We are in no hurry to dispose of our line's 18, the treaty of 1868 you promised us achools and teach crisfor twenty years and those years have gone by and we have he dischools only within the last ten years. He stated that all lands of the reservation should be classed as grazing lands thus enabling those nithed to 169 acres to get it 116 said instead of the heads of a family getting double he amount of land given to women and children the latter ought to

abling those initien to foo acres to get in the said instead of the he dis of a family get ting double he amount of land given to women and children the latter ought to have fully as much or more than their father. The old men would soon die and therefore did not need so much land but the young ones had their way to make and would need it they could get and then he wanted it distinctly understood that when young persons married the woman should not lose her land.

Mad Bear spoke of the failure of the government to keep the treaties of 1868 and 1876 and asked how they should be expected to enter into still other agreements when the old ones had never been fullfilled. While Ghest and Drifting Goose, both of Cow Creek, made long speeches in opposition to the ball and stated that measures had been adopted to trighten the Indians into signing. Members of the committee indused him-sh language towards the Indians.

had used harsh language towards the Indians.

When the Indians finished speaking the secretary said all the speeches had been faithfully written down and would give careful consideration to be in inter. Whatever decision was reached the secretary added would be an iounced to them on the would give careful down he hoped they would at that time be prepared to say whether the would approve or disapprove of the decision which would then be inade known. Blair in connection with a voto message, proceeded to discuss ponsion votoes generally and the case of Mary Ann Doborty in particular. His remarks brought forth a reply from tockrel, of Missouri who warmly defended it e course of the president in regard to pen ion votoes.

In eply to that Blair characterized the president as an infamous abelier in having used his great power to defame and libel this woman Doberty unnecessivity. Mary Ann Doberty he asserted was a woman of irreprachable character while there was no proof o the character of her assutant. At the close of Blair's remarks the president is message vetoing the bill granting a pension to Mark Keychards was laid before the senate he ground of disapproval being that the beneficiary would receive under the action of the pension burcan a much larger aum than she would under the bill referred. Another message from the president, returning, without his approval the bill granting a pension to W.S. Bradshaw was laid before the senate. The ground of disapproval is that disability was not contracted in military service, laid on the table. Hale introduced a bill authorizing the secretary of war to protect the Washington aquedictumels, passed.

Registration

San Prancisco Oct 15—The gr nd total of registrations this evening when the grad register closed, was 30-347

The beavy increase of registration show that the citizens are alive to the political situation. The number of rifid cuts files in 1884 was 29-042 in 1886 at reached 25-562. The explanation offered of the heavy increases is that thousands of citizens who never voted in this city before have registered diarner the past two months. These are to a great extent new arrivily from the east and various portions of the state.

Floquet in a speech introducing the bill
declared that it was not proposed by revising the constitution, to destroy republican
institutions, but to improve them Raysion
was rather aimed against royalist plots and
plots for the areaton of a dictator. Floquet
added that the bill proposed to grant the
ministers a legal period during which they
should remain in power. The ministers
would thus be less procecupied with the
yotes of the chambers. At the same time
the chambers would a ways possess the right
to impeach the ministers. He moved that
the bill be referred to a committee. This
motion was adopted after debat.

turning to Northern waters again in the spring.

After chatting half an hour with his distinguished guest Judge Swan of Port Townsend who by the way has probably done more than any other one man toward securing the services of the Albatross for exploring and locating the fishing grounds on the North Pacific coast Capit Tanner showed the party his various applainces for catching deep sea lish and the machinery for handing the same, also the machinery for taking soundings in from three to thirteen hundred fathoms of water all of which are run by steam power.

They were then shown specimens of a great many different varieties of fish secured during the trip preserved in alcohol many of which were very curtous, and all of which were interesting.

The Albatross was built expressly for the work in which she is engaged and is every confortable and convenient vessel in all respects and the good order and neat condition of everything on board is a credit to her others and crew

THE MELON SEASON ABOUT OVER Portland Has Consumed a Great Many-Small Profits to the Cultivators

The melon season is about over A few watermelons by superfluous in the frint stalls and the last carload of cassabas is at stalls and the last carload of cassabas is at hand. The market has been well suppted with meions of fine quality and large size from couthern Oregon and there have been a great many received from The Dalles where the crop did not do well this year, the meions not attaining their usual size.

It is to be regretted that the men who raised these fine meions made very little profit from the crop. In the first place they are situated too far away from the railroad. The bulk of the meions coming from South ern. Oregon were raised by three men the matrest of whom is about three michs away from the railroad, and one is fitten. The cost of getting the meions to the road is considerable the railroad charges \$56 freight per carload and agreat many are broken or stolen in transit. There are about 1200 in a carload and they sold here for from \$1.50 to \$2 per dozen. Page & Co received thirty seven carloads from Southern Oregon during the month of bept tember which, added to those coming in thom other places, makes a very thereal allowance for this city.

The price realized for melons this year warreally very small for such fine, fruit, and every one who enjoyed it will be sorry to learn that the men who cultivated it did not get better remunerated for their labor. hand The market has been well supp ted

To whom it may conce no This is to certify that our little son Cland who is now 4 years old was afflicted with discharging or running sore erry at the uge of 5 months old, caused by severe cold and continued to grow wor countit the odor from it was so bad at times it was almost unbearable. By all o had severe ear ache at times. About the first of April, this year we took him to Dir. Darrin 235 Fifth street. Portland, who commenced freating him and in three months in erranda quite running and to day they are sound and well and be hears as good as can be like cate is perfectly satisfactory in every particular, and we can cheerfully recommend the doctors and that treatment to those samilarly afflicted.

One of the quickest cures ever performed by the Drs Darim took place on Sunday lat t On Iriday there arrived in the city from Linckannas counts a mitter by the name of Stallnaker His left knee was swo len's othat if filled the leg of his panta loons tighth. His called o'r the doctors on Saturdar and took one of their clictro magnetic treatments which with a liminent rubbed on so reduced the swelling, that the knee was reduced down to its normal condition in twenty four hours. Mr. Bidinaker wis cured and very grateful to the accitor for curing him. The swelling was caused by exposure and myur? in the mountains and would have resulted in the loss of the leg if u cure had not been affected in time. Mr. Shalnaker is a man entirely without mians, set to the credit of Drs Darrin be it said they freated him free of chirge and gave him five dollars worth of middines be sides. This case is certainly the most remarkable for being a quick care, the North we that as ever had in its bount free. Mr. Stalnaker now resides in Last Portland. P. O box No 388

Very well Mr Thurman Now let us ask whether your party proposes to repeal the taxes (duties) on clothing tools and implement It does not. On the contrary it proposes to con't me these duties at high rates—an average of 42 per cent. If it is so obtained an average of 42 per cent. ohytous an absurdet, to tax a man on all he wears on all his wife and children wear on sal his tools and implements of industry why not repeal all these tixes or dubes and give us free trade in a othing and tools must 48 Your party proposes to live us free trale

Mr Thurman him-cif asks a question to nit Does no every wel informed man know that the increase in the price of Lonmanufactures produced by a high tartifides rot to into the pockets of inhous into call it only tends to swell the profits of o hit.

That is protection doesn the goods ago. people ligner wages. Then if it doesn't was 1 is that 40 per cent for which is imposed as a cut, by the M listill upon the whole line of clothing and working goods? If protection doesn't give the netter wages to the workinsia who makes to goods this 40 per cent, and if he the protection to a city, by the protection to a city, by the protection of the second state per cent is a gift by the government out right to the manufacturer. That is the government lever a tax of 40 per cent upon all the clothing of the country and turns the all the isotating of the country and turns the proceeds into the manufacturer; potter, And as if for the pulpose of making the profits of the manufacturer still larger it is proposed to take protection from the wool grower with the vowed object of a ring the

manufacturer cheiper wool

Thus the democratic tariff scheme is ab-surely illogical. It assumes that protection doesn't true revewages hittigives larger profits to the minufacturer yet proposes to assure to the minufacturer protection at the rate of 40 per cent on all his goods and to strip the producer of materials wholly of protec Never was there a grosser exhibit of

Mr Phyrman asks further Poes not every man who looks around him know that an immense majority of the laborers of America are not engaged in whit are called the protected industries? I very man does not know this for it is not true. Some in dustries in which our facilities of production are superior are not protected bout ise in them protection is not needed but the pro their protection is not needed but the pro-tective system as maintained during many years just covers all important in firstrice in which foreign countries could compete with our ow. Mr. Thurman and his party come forward however with a proposition to in crease the number of in lustries that are not protected the roducers of wood and other in atorids who are numbered by millions are to be object to restriction and the re-to be object by a cityling to ma defectivers.

to be obliged to just tribute to maintacturers. Than the temocratic tauff scheme mothing, could be more one sided or under. It is unliqued to the upractice and the process and the process and the second second to the second second to the second se and mak the manufacturer richer than ever This would be its result if it could stand but it to id not stand. The country would not long ubmit to free tride for the firmer and mi or aid protection for the majuracturer

The reput tean terriff | II projects a fair and equal system for all the interests of the country titles not propose to strip the country. It does not propose to strip the laborer in the field, the mine and the forest of it fection and continue protection with of It tection and continue protection with the additional layor of free trade in mate raise to the mainfedurer. Moreover, it proposes to reduce the protection so long en-joyed by the planters of the South to some thrus the equality to that of the produce thing the equality to that of the producers of the North and West. It proposes to deal with the subject in a spirit of farness, to dinterests, and to maintain protection not as a cartial system but as a uniform and con si tent po cy. THE OREGOVIAN recently referred to the THE ORROGATAN recently returned to the prohibitory rates to Oregon fruit shippers charged by the railroads. In further liftus tration of this extortionate policy an army officer stationed at Fort Sherman, Idahp near Cour d'Alene informs us that he ordered a Portland firm to send him a case of clarat hypersess. The shippers will for ordered a Portland firm to send him a case of claret by express. The shipper's bill for the wine was \$5, while the express charges were \$3. In the long run it is folly for a railroad and express companies to charge prohibitory rates, for it is death to what could be made a valuable trade. The experience of all railroads it that cheap rafes to local shippers or passengers increases the volume of business so rapidly that it pays to simulate it into hie instead of stamping it out or paralyzing it. The switch stimulate it into life instead of stamping it out or paralyzing it. The system of commutation tickets sold by railroids in the rural districts of the least bins been immensely profitable, and has been generally adopted by railway corporations that once neglected it under the mistaken idea that the commutation system would only pay where the commutation in a suburban town but even in rural New England reasonable rates for freight and passenger travel bring the railroads more profit than the other policy of cheap through rates, trusting to skin and scalp the local customer. The result of the prohibitory rates is to retard the development of many hinds of business, to cripple the growth of the state and to make the rulroad goese re-fuse to lay golden eggs or incubate on the eggs of any enterprise of value to the people

An Excellent Reer

The many good qualities of Weinhard s beer has endeared at to the people of the Northwest and its celebrity is so whichly extended that there is scarcily a city town, hamlet or village in which it is not largely used as a beverage. As a pure healthful and invigorating drink it is not equaled on the coast.

we had the time and souce we would write a column on this subject, borne we have not, we will content ourselves by remarking that to the average lady there is probably no one article possessing more interest in the entire range of dry zoods than a handsome dress fabric. We believe that we have succeeded in planny on our counters the very Cream of Foreign and Domestic 'abrics. We made our selections with the utmost care, and are positive that we are showing a larger range of both Novelties and Staples than any house in the line.

New Weaves. Beautiful Designs, Handsome Finish. Stylish Effects. Fine Colorings.

These are some of the qualit es we claim for our dress materials. We would also remind you that no dress is complete without suitable trimmings, and we are prepared to supply suitable trimmings for any style of a dress. YOU ARE INVITED TO VISIT OUR STORE.

Owing to the rush for Cloaks during the past week, several of our friends were disappointed in not finding the size wanted in some of our garments, as they had already been disposed of. We Telegraphed to our New York House for a fresh supply, and will be able to meet alledemands the coming week, either for ong or short Wraps.

The changing season being suggestive, we wish to call special attention to our unequalled stock of

BLANKETS, QJILTS, COMFORTS.

We have made great preparations. We are showing unusually attractive goods.

We will give you the best value to the square inch in the city. We want to deliver the goods now.

Brawn and Brain!

The powerful engine with its wonderful propeling power coupled to the long trun tall freighted with the rachest fabrics of the intellectual floors of the centuries—what obstacles can stay the progress of this mighty force when once in der rull is earn along lift's highway.

The American with brawn and brain does not see the necessity for titles of nobility does not care for elevation by descent he can reach out and plack the stars.

But with brawn or brain impaired a man is body handicapped in the mod lace for fact is which by the marked characteristic of the prevent age.

The physical system is a most intricate piece of in chinery if rought to be kept well regulated so that it will work har momenals in all its parts then its carable of an immarine amount of work.

It is said that a watch if expected to keep perfect time must be good daily. It will not keep good time unless it ru is regular. More men break down mecause they don't run regular? Than for any other reason. It is claimed by physicians that five inen are killed by hird work. It is to the uregularities of modern social life that the high death rate is due. Men burn their candicate both each seem of words why it burns out so quicking the conditions and allows to condition to conditions to condition to conditions to condi

goth ends then wonder why it burns out so quackis.

The mean thing in Leeping the human machine in good working order is to keep the regulator all right. The blood is the life and sound health is assured so long as the blood flows through the vehiss a limple stream of purity.

Regulate the regulator with Wagner's Log Gabin sursaparilla, the old fashigned blood puritier, prepared after the best togrnula in use by our ancestors in good old log cabin days, and with the vigor of hraws and brain which must ensue in your Hid's lexicon you will find no such word as fall.

Extract from letter received Sept 18th II is m possible to gir's even andea of what I have suffered for years. I third everything and doctored with the best doctored on the coast-at times getting a few days relief, only no be followed by a return of my stomach troubles. Last spring I begon taking your Yerba Bronn Billet's and for two mounts now I east every thing that a planed before me my sleep in require, and I again able piecular in the society of my friesch."

Nervons exhaustion comes from mal nutrition of the nerves. A moted scientist, has discovered that if the albumen, which issue the nerves, is not fully digested to the conditions of water it cannot be also arrived by them hence starvation and authention. Consequently they are noureshed only in proportion to the ability of the stomach to prepare their food, which is the most unfoul of all the loods to digest, as it must be perfectly sime. Not one summach in five can prepare a sufficient quantity. Bitherto artificial digestion has only been able to digest it fine amough for the blood, which only circulates to the muscles and bones. Three ylears ago this was overcome and as now made has cured a large number of cases of paralysis and cures the nervous and lived in a few hours. The preparation is said at the druggists as Moxie Nerva Food for 50 cents a quark bottle. 23-3m

Weinhard's Success.

The business career of Henry Weinhard of Portland Obegon demonstrates that it only needs a good supply of energy enterprise and desire in a man to do the fair square thing by his fellowman to enable him to succeed in his chosen calling. Many years ango Henry Weinhard set to work deterribled to make a boer that would be pure and first class in every essential. He was detern used too, to act square by his fellow citizens in all his interrourse with them never allowing any deleterious substances to enter in o the manufacture of his beer nor let my of this bevering go on the market unless it was fully up to the high standard he had set for it. By constantly adhering to this practice he has grown into a business success of which he may well be proud His beer is now universally used throughout the whole Northwest country and such is its excellence and good qualities that the demand for it is more rupidly increasing than ever before.
